

➤ **Project Description:**

- This project is a personal portfolio website that was developed for CS5610 Web Development in the Summer of 2026 Term. This website introduces my academic background, technical interests, and professional goals as a Master's student in Computer Science at Northeastern University. The project includes a responsive homepage, an About Me page, and an AI-generated Resume page created using HTML, CSS, Bootstrap 5, and JavaScript. The website also includes an original JavaScript creative addition regarding a live greeting and clock component to create a more interactive user experience on my website.

➤ **User Personas:**

- **User Persona 1 – Curious Website Visitor**

- Name: Jane Doe

- Demographics:

- Age: 43
 - Normal non-technical visitor or previous professor from your educational past.
 - Learn more about the owner of the website and visit resources available to them through webpages.

- Goals:

- Extract information about Timothy's professional and personal background, goals, and growth opportunities.
 - Acquire knowledge about what he is currently studying and learning.

- Pain Points:

- In some cases, available websites today are either overly complex or visually perplexing regarding clutter and design choices.
 - Hard to understand technical jargon .

- How the Website Helps:

- The 'About Me' page explains Timothy's path into computer science at a glance.
 - Personal interests such as Djing, drawing, cooking, and athletics make the site more approachable.
 - The timeline and learning sections simplify Timothy's educational journey.

- **User Persona 2 – Recruiter from the Tech Industry**

- Name: Ryan Gross
- Demographics:
 - Age: 34
 - Technical recruiter for a software company (FANG company).
 - Based in Washington, DC.
- Goals:
 - Quickly evaluate students for internship opportunities, best-fit analysis, or entry-level technical roles.
 - Review technical interests, coursework relevance, and professional presentation.
- Pain Points:
 - Many student portfolio websites lack organization or professionalism (perception management).
 - Difficult to quickly identify technical skills and educational background.
- How the Website Helps:
 - The Resume page clearly organizes education, technical skills, and coursework.
 - The homepage introduces Timothy's current technical focus areas.
 - The navigation bar allows for fast movement between pages on the website.
- **User Persona 3 – Computer Science Alumni Student from NEU**
 - Name: Jared Films
 - Demographics:
 - Age: 29
 - Master's student in Computer Science from the Boston Campus.
 - Interested in software engineering and web development.
 - Goals:
 - View another student's portfolio for inspiration for their own website design/content.
 - Learn how the student used Bootstrap layouts and responsive designs.
 - Pain Points:
 - Beginner-friendly website examples can be difficult to find on the internet without optimized search engine meta tags.
 - Many portfolio sites are either too complex or visually cluttered.
 - How the Website Helps:
 - The website uses a clean Bootstrap grid layout and readable structure.

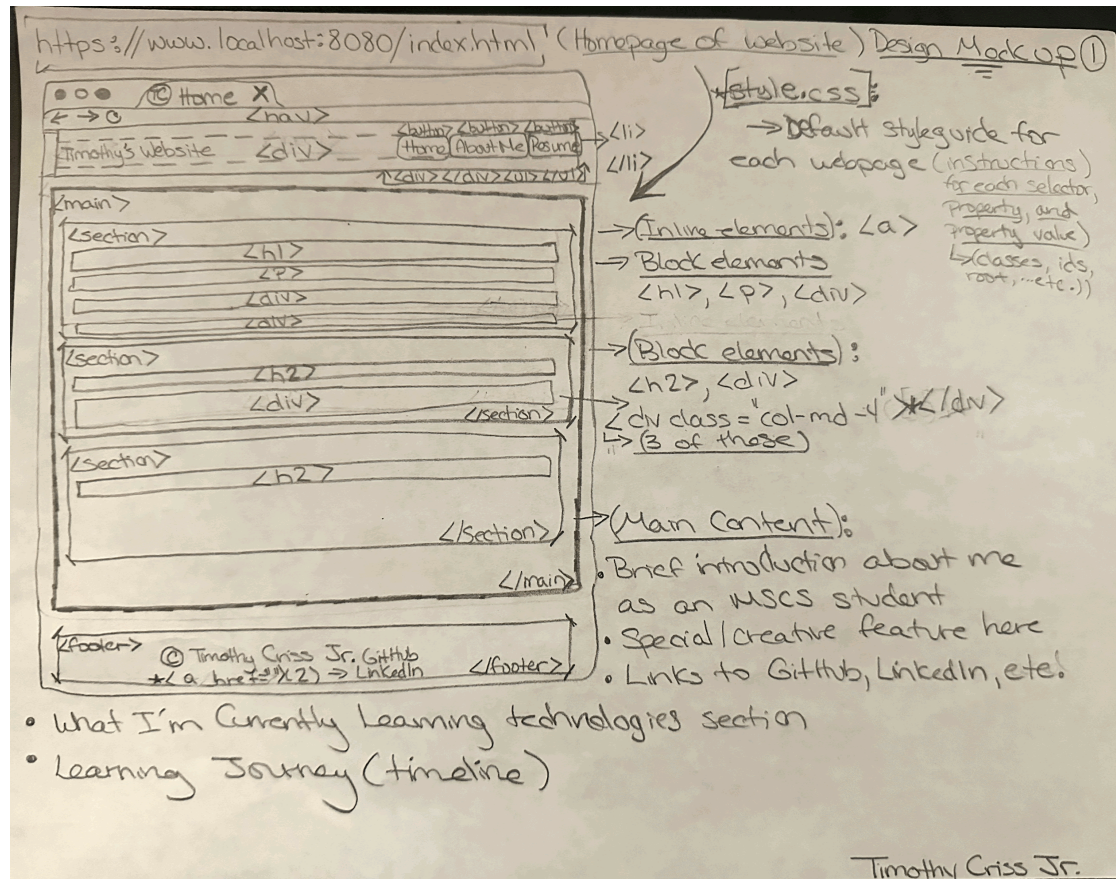

- The ‘About Me’ page provides relatable academic and personal background.
- The JavaScript clock feature demonstrates a beginner DOM interaction.

➤ **User Stories** (Use cases but with a story):

- User Story 1 — Homepage Navigation
 - As a visitor exploring Timothy Criss Jr.’s website, I want to quickly navigate between the Home, About Me, and Resume pages so that I can easily learn about his background, technical skills, and academic journey.
- User Story 2 — Resume & Technical Skills
 - As a recruiter reviewing Timothy’s portfolio, I want to view a clearly organized resume page with technical skills, coursework, certificates, and educational background so that I can quickly evaluate his qualifications for technical opportunities.
- User Story 3 — Interactive Homepage Feature
 - As a user visiting the homepage, I want to see a live greeting and clock feature that updates dynamically so that the website feels interactive, modern, and personalized rather than static and boring.

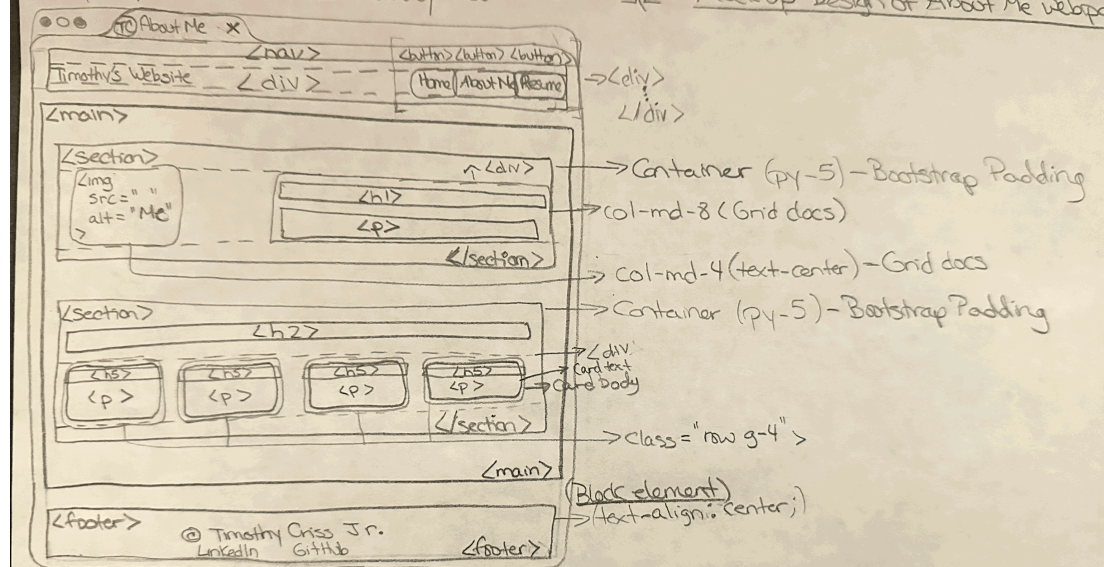

➤ **Design Mockups** (Screenshots):

- **Mockup #1** (index.html):

- **Mockup #2** (about-me.html):

[https://www.localhost:8080/about-me.html] 2nd Mockup Design of About Me webpage

(Main Content): About Me

- hobbies, description about my path and more about me information beyond education.

Timothy Criss Jr.
